

# Challenges of Assessment Design in HE in the Era of AI

**Farha Lakhani**

Queen Mary University of London, London, UK.

## ABSTRACT

The effective use of Generative Artificial Intelligence (GenAI) in education is rapidly increasing, specifically at the higher education level, and educators are exploring this technology to make the best use of it. Students' extensive use of GenAI tools imposes challenges for educators to enforce GenAI-resistant assessment design. It is not easy and practical to inhibit the use of these tools; therefore, educators must be strategic in designing learning activities and assessments such that they can encourage students to educate themselves with GenAI technology and use tools and also foster their critical thinking process. The keynote speech will discuss different aspects of GenAI technology and its impact on assessment design in Higher Education.
